Customer Reviews

Have taken every other class in Microsoft suite 2010 and all of the comprehensive books required by the classes I am taking have been exceptionally right on with learning concepts one needs to get ahead. I recommend these books by Shelly. They are the best. Cengage website for the free data files works best with Google Chrome as there may be issue with IE9. I bought the book for under \$85 I think and it came from the vendor in like new shape.

My college switched books and didn't communicate the switch in time, so I bought the wrong book. I haven't decided whether or not I will keep this one for reference. I'm renting the new required book.

This book is great! It covers most anything you would ever want to know about Power Point. It also includes a section on Office 2010 basics which proved to be very helpful as a resource tool. I highly recommend this coursebook to anyone interested in learning Power Point.

I purchased a Kindle Fire for many reasons, one of which to save money and space on my text

books. I purchased this textbook in Kindle form, but it has no page numbers for reference. It gives some "location" number instead of book pages numbers, which is useless because an instructor is going to use page numbers for reference. I had to return the ebook version and pay more for paper text and shipping so I could even do my assignments which were given on certain page numbers. I suggested to that they note this in the ad for the books if there is no way to know what page number you are on.

This book teaches you all of the ins and outs of MS PowerPoint and it breaks down everything into easy to follow instructions. I couldn't believe how much you could do with PP.

Received the book in less than a week, & in great condition! Would have preferred not to pay as much as I did, but it was the best price I found after looking for several days.

WARNING! The student data files cannot be downloaded from the Cengagebrain.com companion site. This makes the book useless for university and college teaching courses. I contacted customer service on multiple occasions and they would not believe me that their server was slow and causing the downloads to timeout and stop. The student data files for the first eight chapters is a whopping 164MB file. Very poor planning to require zip files of this size. We tried multiple browsers on home and school networks and still could not download the files and received security warning messages from Internet Explorer 9. This book is very expensive at \$114. For Cengage.com to not provide enough bandwidth for students to download the required files is unprofessional and shows ineptitude on the part of the IT managers to not do the basic monitoring of their networks. **DO NOT BUY ANY BOOK WITH CENGAGE MANAGED BOOK COMPANION SITES.**

Step by step understand of each process. Nicely illustrated. Anyone could learn from this book, you don't have to be a student and can still get the online support.
